

AEROFLEX EPDM™Continuous Tube

Unslit EPDM Pipe Insulation

AEROFLEX EPDM™ Continuous Tube

Unslit EPDM Pipe Insulation

HVAC | VRF | Refrigeration | Linesets OEM | Hoses | Plumbing

Closed-cell continuous tube insulation for rapid, slide-on installation on longer lengths of copper tube and other piping. Ideal for applications that involve long lengths of tubing such as HVAC linesets and VRF/VRV systems.

Proprietary blend of nonpolar EPDM rubber is key to consistent, long-lasting thermal performance and protection against moisture and environmental stresses.

Available in ID's ranging from 1/4" - 2-5/8", wall thicknesses from 1/4" - 1-1/2", with or without talc. See back cover.

Fast, simple to install

Slides easily over new piping

Can be slit, snapped and glued over existing piping

Built-in vapor retarder - No supplemental vapor retarder required for most applications*

Superior environmental stability

Nonpolar - does not induce or react with water

Greater UV resistance than NBR/PVC insulation

Non-corrosive on stainless steel and copper piping

Suitable for interior and exterior applications**

Safe for indoor environments

Superior fire safety - 25/50 rated (ASTM E84, UL723, CAN/ ULC-S102) and self-extinguishing (ASTM D635)

Indoor Advantage[™] Gold Certified for low chemical emissions

No CFCs, HFCs, HCFCs, PBDEs, formaldehyde, nitrosamine or fibers

Naturally mold-resistant: no biocides required

Ultra-low PVC content - less than 1%

AEROFLEX EPDM™ insulation system solutions

Aerofix®

Light-weight, rigid pipe supports, pre-insulated with high-density, load-bearing closed-cell foam and encased with zero-perm EPDM polymer membrane. Includes built-in pressure sensitive Protape® closure system.

AeroFit™

Pre-fabricated fitting covers made of AEROFLEX EPDM™ rubber for high-quality installation on HVAC and plumbing piping.

Protape®

Zero-perm EPDM-based, self-adhering rubber tape for sealing glued insulation seams and termination points.

AEROFLEX® Adhesives

Specially formulated adhesives for bonding and vapor-sealing AEROFLEX EPDM™ insulation. Fast tack and LVOC formulations available.

*Supplemental vapor barrier may be required in extreme lowtemperature or high-humidity applications. Protective jacket required for direct-bury applications and if insulation may be subjected to mechanical damage.

**Note: National, state & local energy codes require protection of cellular foam pipe insulation from solar radiation for exterior applications. Jackets and insulation coatings are acceptable. Adhesive tapes are not permitted.

Installation **Instructions:**

Standard Specification: ASTM C534 Type I Grade 1

Thermal Conductivity (K) Btu-in/hr-Ft² -°F (W/m.K)

Mean Temperature	K Value	Test Method
50°F (10°C)	0.237 (0.0342)	
75°F (24°C)	0.245 (0.0353)	
100°F (38°C)	0.252 (0.0363)	
125°F (52°C)	0.260 (0.0375)	ASTM C177/C518
150°F (66°C)	0.267 (0.0385)	
200°F (93°C)	0.282 (0.0406)	
250°F (121°C)	0.315 (0.0454)	

Physical and Operational Properties

Property	Test Value/Rating	Test Method ASTM C411 ¹		
Service Temperature, CONTINUOUS	-297°F to 257°F -183°C to 125°C			
UV Resistance	Minimal cracking or color change	ASTM G7		
Ozone Resistance	No cracking	ASTM D1171		
Water Vapor Permeability, Max	0.02 perm-inch (4.38 x 10 ⁻¹¹ g/Pa.s.m)	ASTM E96		
Water Absorption (% by Volume), Max	0.2%	ASTM C209/C1763		
	Pass	UL94 V-0		
Confere Bornie - /Element iiit : 4th annu h 2ll thiata	25/50	ASTM E84, UL723, CAN/ULC-S102		
Surface Burning/Flammability (through 2" thick)	Pass	NFPA 90A/90B		
	Self-extinguishing	ASTM D635		
VOC Emissions	< 0.5 mg/m3	CDPH Standard Method v1.2		
Corrosion of Stainless Steel	Non-corrosive	ASTM C692, DIN 1988		
Fungi Resistance	No Growth	ASTM C1338/G21		
Mold Resistance	No Growth	UL181		
Linear Shrinkage	< 7.0%	ASTM C534		

¹ AEROFLEX EPDM™ flexibility begins to decrease at -70°F and below. This does not impact the insulating properties of the material.
